

# IPv6 in the ARIN Region

**17 October 2012**  
**Australian IPv6 Summit**

**John Curran**  
President and CEO, ARIN

# History of the Internet Protocol

- **Internet Protocol version 4 (IPv4)**
  - Developed for the original Internet (ARPANET) in 1978
  - 4 billion addresses
  - Deployed globally & well entrenched
  - Allocated based on documented need
- **Internet Protocol version 6 (IPv6)**
  - Design began in 1993 when IETF forecasts showed IPv4 depletion between 2010 and 2017
  - 340 undecillion addresses
  - Completed, tested, and available since 1999
  - Used and managed similar to IPv4

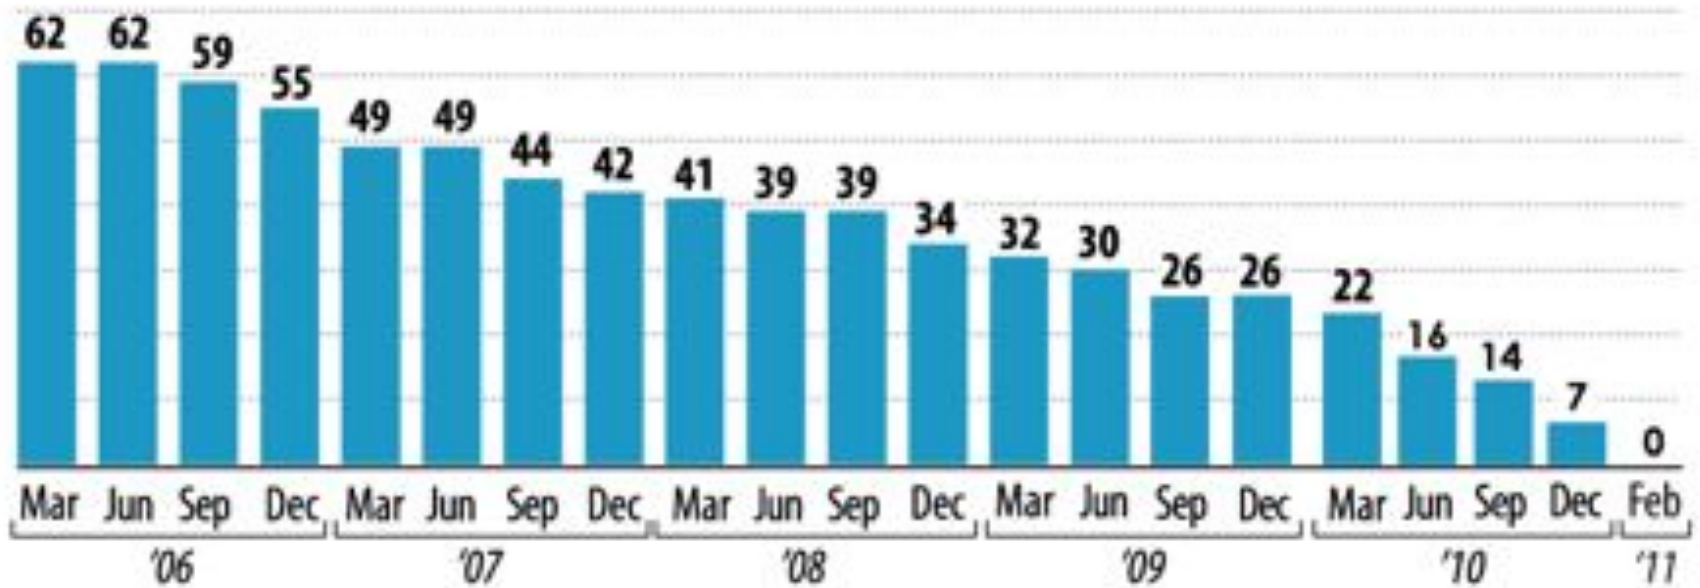

# IPv4 Depletion Situation Report

Each RIR received its last /8 from IANA on 3 February 2011

The IANA free pool of IPv4 addresses reached 0%

# Global IPv4 Depletion

IANA IPv4 Space in /8s

# ARIN's IPv4 Inventory

As of 11 October 2012, ARIN has 2.83 /8s of IPv4 addresses remaining

The screenshot shows the ARIN website homepage. At the top left is the ARIN logo. A navigation bar contains links for NUMBER RESOURCES, PARTICIPATE, POLICIES, FEES & INVOICES, KNOWLEDGE, and ABOUT US. On the left is a login section for ARIN ONLINE. The main content area features a central banner with the text: 'ALLOCATING Internet number resources', 'DEVELOPING Consensus-based policies', 'ADVANCING The Internet through outreach', and 'SERVING Canada, many Caribbean and North Atlantic Islands, & the United States'. Below this is an 'Announcements' section with several news items. On the right, there is a 'Highlights' section with links to Request Resources, Draft Policies & Proposals, Legacy Resource Information, Meetings, and Transfer Resources. A 'Site Search' box is also present. A prominent banner in the lower right of the screenshot reads 'ARIN IPv4 SPACE AVAILABLE' and 'ARIN's IPv4 Inventory & IPv4 Depletion /Countdown Plan' with a 'LEARN MORE' button. A blue arrow points from the text on the right towards this banner.

IPv4 inventory published on ARIN's website: [www.arin.net](http://www.arin.net)

Updated daily @ 8PM ET

# ARIN's IPv4 Countdown Plan

- Process for final IPv4 requests
  - Divided into 4 phases
  - Length of each could vary
    - Global policy to return space to IANA
    - Faster depletion due to:
      - Large requests
      - Policy changes

[https://www.arin.net/resources/request/ipv4\\_countdown.html](https://www.arin.net/resources/request/ipv4_countdown.html)

# The Solution to IPv4 Depletion

- IPv6 must be adopted for continued Internet growth
- RIRs allocating since 1999
- Thousands of organizations have received an IPv6 allocation to date
- Now is the time to deploy IPv6

# How can you get started?

- **Dual-Stack your networks**
  - IPv6 not backwards compatible with IPv4
  - Both will run simultaneously for years
- **Servers must be reachable via both IPv4 and IPv6**
  - Mail
  - Web
  - Applications
- **Do you operate a website?**
  - Ensure content will be available to all customers
  - Even new Internet users with an IPv6-only address

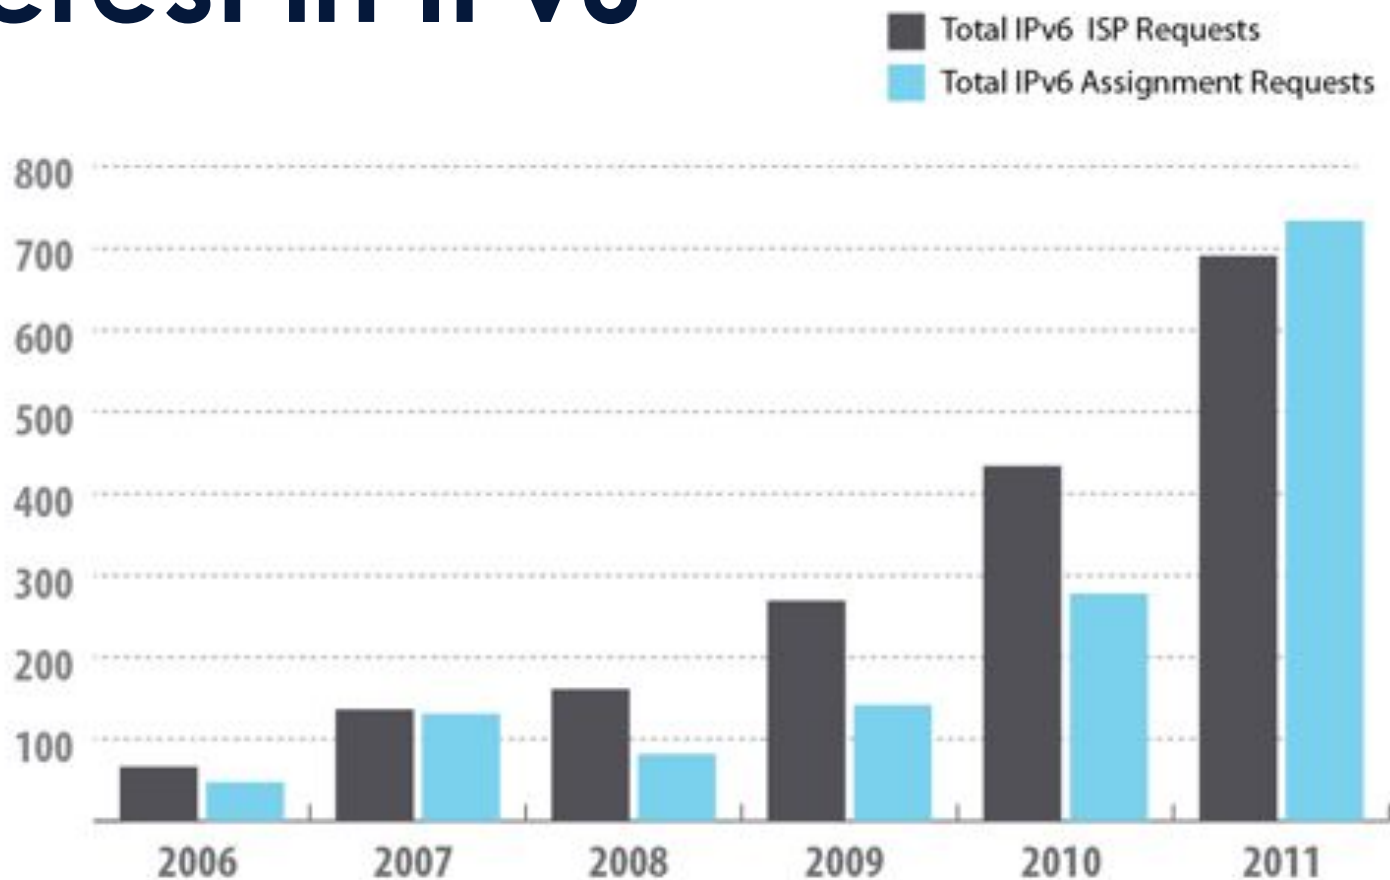

# How can you prepare?

- **Talk to your ISP about IPv6 services**
  - You want access to the entire Internet
- **ISPs must connect customers via IPv4-only, IPv4/IPv6, & via IPv6-only**
- **Must plan for IPv4/IPv6 transition services**
  - Many transition technologies available
    - Research options
    - Make architectural decisions

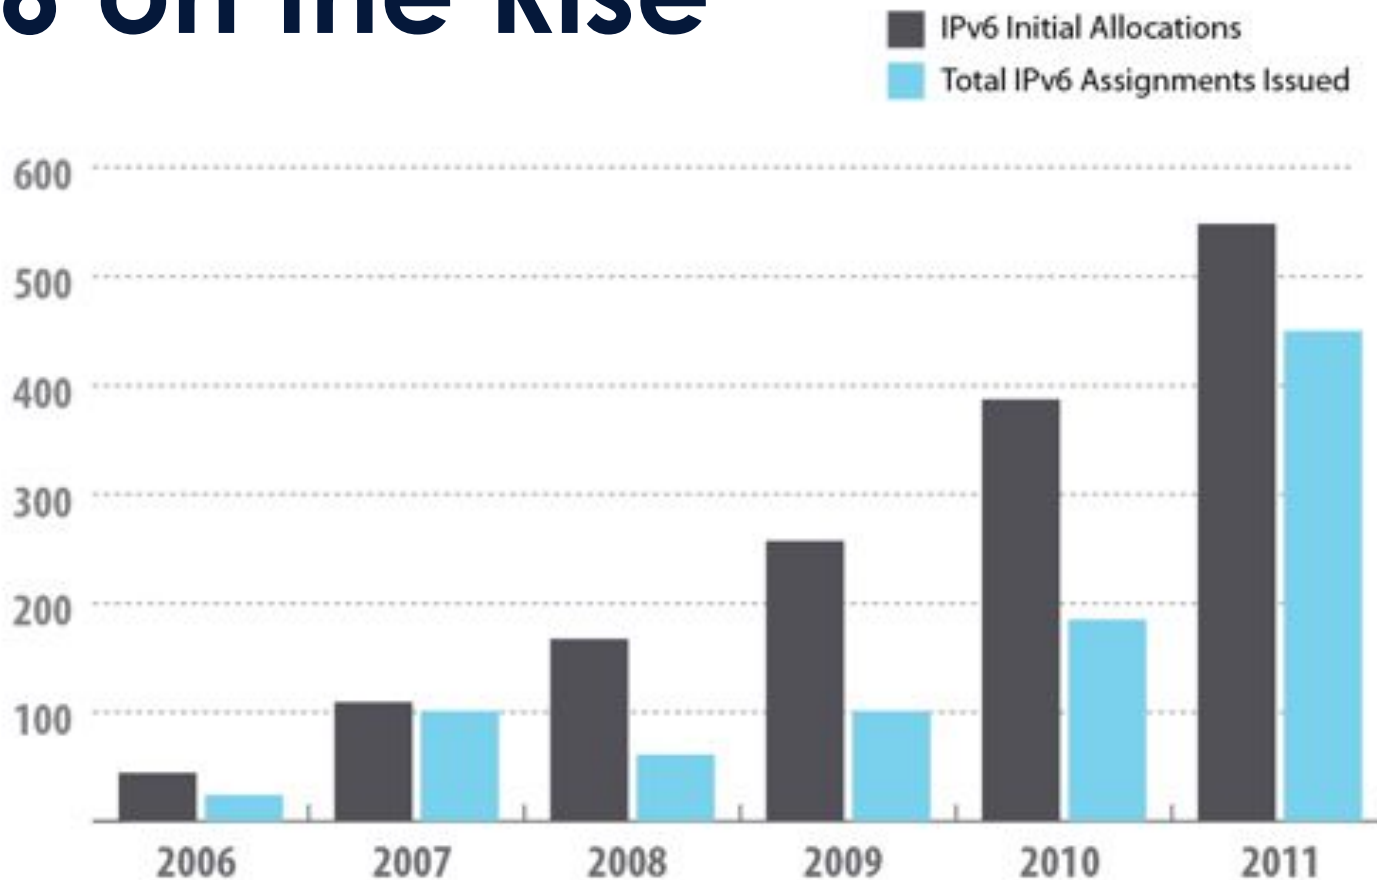

# Interest in IPv6

ARIN IPv6 Address Requests

# IPv6 on the Rise

ARIN IPv6 Allocations and Assignments

# 2012 NRO Global IPv6 Deployment Survey

- IPv6 Gaining Traction
- Approx. 1 430 respondents from 105 economies
- 77% of respondents have some level of IPv6 presence, indicating increased uptake from previous years

<http://www.nro.net/documents/2012-ipv6-survey-results>

# Survey Results: Organizations with an IPv6 presence

# What Can Governments Do?

- **Government and the Internet community need to coordinate to support and promote**
  - IPv6 awareness
  - IPv6 education
- **Governments should consider:**
  - Regulatory and economic incentives to encourage IPv6 adoption
  - Required IPv6 compatibility in procurement procedures
  - Official IPv6 deployment within agencies

# US Government IPv6 Uptake

- Committed to the operational deployment and use of IPv6
- Initiative to make all federal websites and networks IPv6 capable
- 100s of websites already IPv6 enabled

# World IPv6 Launch

Many top websites, Internet service providers, and home networking equipment manufacturers permanently enabled IPv6 for their products and services on

**6 June 2012**
